

Aluminium Panel Repair Kit

This kit is a collection of tools vital for the repair of aluminium panels. It is recommended to have a dedicated aluminium repair tools kit which will avoid cross contamination with galvanic corrosion - use the steel tool box and tote tray to keep tools separate.

Additional Information

- Dedicated aluminium repair tool kit to avoid cross contamination.
- Ideal for PAS125.
- Includes a range of dollies, hammers, chisels, together with a bump flat file, wire brush & image profiler.
- All contained in a robust tool box.
- Dimensions: 525mm x 250mm x 200mm (closed) / 800mm (open).
