

## Magnetic Panel Edge Protector

A high-visibility magnetic panel edge protector designed for use during sanding and grinding to help prevent any damage to vehicle bodywork panels next to the one being worked on. This flexible nylon strip hooks over the edge of the panel, and is then held in place by the 16 integral magnets, creating a barrier to help avoid any accidental damage.

### Additional Information

- Flexible magnetic edge guard to protect surrounding panels during sanding & grinding.
- Length: 545mm; Width: 43mm.
- Manufactured from Nylon.
- Features 16x strong 17.5mm $\square$  magnets.
- Also suitable for use during panel re-assembly.
