

Cordless Weld & Slide Dent Puller

A slide hammer and resistance welder in one - with the added benefit of being cordless providing greater flexibility around the bodyshop. Simply press onto the area to be repaired, press the button to weld the tip to the metal and pull back along the shaft to complete the slide hammer action. Simply turn ninety degrees to break the weld. As the instrument provides the earth and welding tip circuit in a small, very focused area, it is ideal for the repair of electric and hybrid vehicles.

Additional Information

- Ability to do 1500 welding points, with 100% charged battery. Battery charge time: approx 90 mins.
- Welding current values of 2500 amps. No consumption / absorption on the 16 ampere power line.
- Colour LEDs for signaling the various operations. Lightweight: 2.9kg.
- Supplied in a case with the battery charger module. Extended 2 year warranty or 120,000 welds.
- Replacement parts available, Part Nos. 91001 (copper welding tip) and 91000 (copper earth).
