

Ratchet Wound Windscreen Removal Kit

A cord and winding style windscreen cutter. Uses a cutting line pulled by a ratchet to cut out a bonded screen. Much less effort is required than using traditional hand pulled blades.

Additional Information

- Kit includes: 145mm Dia. Vacuum cutting line anchor, 145mm Dia. Cutting line guide pulley, 145mm dia. Cutting line winder.
- Aramid wire cord, piercing wire feed tool, Chisel installation stick, Hook pick tool, Ratchet & socket (for winder), Dash protection board.
- Simple to use: Place the winder on the screen inside the car. Feed the cord through to outside & feed around the outside of the screen.
- Use cutting line anchor on the outside of the screen. Use the guide pulley on the inside to ensure a good cutting angle.
- Traditional knife & rope saw windscreen removal kit also available, please see Part No. 92723.
