

## Adhesion Pro GP System with Pulling Tower

A comprehensive set of GP (Glue Pull) repair tools and consumables, designed to reduce/remove dents in vehicle bodywork whilst minimising damage to the paintwork, supplied in a 4-drawer cart with foam inlays. This kit also features the popular Power-TEC pulling tower (Part No. 92767), which is designed to reach a pulling traction force up to 600kg. It is counterbalanced by an anchoring plate / suction pad, which features a vulcanised rubber pad and is held onto the ground using the workshop air supply, allowing it to be used anywhere on the workshop floor without the need to drill in any anchor points or fixings.

### Additional Information

- 187pc PDR hot & cold glue dent pulling kit, supplied in heavy-duty lockable cart, with pulling tower (Part No. 92767).
