

Multi-Head Cordless Polisher Kit - 12V

The Power-Tec 92750 Cordless Polisher features a 6-speed brushless motor and comes supplied with three interchangeable gear heads, allowing you to select the appropriate head depending on pad diameter and speed requirements. The kit includes two 12V batteries for added convenience, with the lighter 2.5Ah battery reducing weight during overhead work (such as removing scratches on a roof). This makes it ideal for tasks where pneumatic polishers are not suitable. Also included is a selection of compact polishing heads for small to medium-sized work areas (such as PDR finishing), along with a twin dock mains charger with a standard 3-pin UK mains plug.

Additional Information

- Features a 6-speed brushless motor with an easy to read digital display.
- Includes 3x interchangeable gear heads: 1x 2,500 - 5,000rpm, size 15, 20 & 30 mm □. 1x 600 - 1,200rpm, size 50 & 75 mm □. 1x 2,500 - 5,000rpm DA, size 50 & 75mm □, eccentric distance 12mm.
- Supplied with a large selection of polishing pads.
- Supplied with 2x 12V batteries (1x 2.5Ah & 1x 5.0Ah) & double dock charging station with UK mains plug.
- Supplied in a soft-shell case for storage. For EU charger please see Part No. 62930. CE, UKCA & RoHS compliant.
