

Pro Pull Welder

A compact mains-powered panel repair welder supplied with two types of dent-pulling slide hammer, a six-jaw pulling hook, and spot weld and heat shrink tools. Suitable for dent removal on vehicle bodywork. Connect the slide hammer to the welder, which is used to hold and weld the copper-coated pull triangles to the panel. The slide hammer is then used to pull out the damage. Designed for use with a 230V 16A single-phase power supply, it comes fitted with a 16A single-phase commando plug and features an integral carry handle.
